Professional Summary

Network Engineer with experience configuring and maintaining enterprise network infrastructure — routers, switches, firewalls, and wireless access points — across LAN, WAN, and wireless environments. Skilled in routing and switching (OSPF, VLANs), firewall rules, ACLs, and VPN tunnels, with NOC and TechOps experience resolving 5,000+ ITSM tickets within SLA. Strong in network monitoring, Layer 2/3 troubleshooting, and network documentation, with clear communication across technical and non-technical teams. Building a solid network foundation toward network security and SOC operations.

Education

Bachelor of Computer Engineering **Sep 2018 – May 2024**

Graduation Project:

- Developed and trained a deep learning model to estimate the State of Health (SOH) of lithium-ion batteries.
- Applied neural networks to analyze real-time data and predict battery performance degradation.
- Enhanced predictive maintenance capabilities.

Experience

Network Engineer – KraftxLab **December 2025 - Present**

- Configured and managed network infrastructure and network devices, including routers, switches, firewalls, and wireless access points, across multiple client deployments.
- Deployed VLANs, inter-VLAN routing, and dynamic routing protocols (OSPF, VLANs) to segment traffic and optimize flow.
- Administered firewall rules, ACLs, and VPN tunnels to enforce network security policies and secure remote access.
- Monitored network performance and availability using SNMP, syslog, and traffic analysis tools.
- Troubleshot Layer 2/3 connectivity issues (switching, routing, DNS, DHCP) across LAN, WAN, and wireless environments.
- Designed and documented network topologies and network diagrams, standardizing configuration baselines for client deployments.
- Collaborated with development and embedded systems teams to integrate network connectivity into IoT and edge solutions.

NOC Engineer – Meeza **November 2024 - December 2025**

- Completed a **2-month TechOps rotation** focused on firewall operations and connectivity troubleshooting.
- Monitored network health, reviewed firewall policies, and processed access changes for enterprise clients.
- Resolved over **5,000 ITSM tickets** while consistently meeting SLA targets.
- Handled **600+ advanced cases** involving virtual machines, system performance, and network connectivity.
- Provided technical support across computer systems, applications, and network services.
- Supported operating system software (Windows), Microsoft 365, VPN access, and enterprise applications for end users.
- Administered Active Directory accounts, permissions, and group policy updates.
- Diagnosed and resolved computer hardware and software faults on desktops, laptops, and mobile devices.
- Escalated critical incidents to Tier 2/3 teams with clear technical documentation.
- Authored knowledge base articles and tracked technical logs for recurring fixes.

IT Business Analyst – Applab **August 2024 - October 2024**

- Analyzed and documented requirements for **3 government web projects**: Ministry of Social Development and Family (MSDF), Qatar Rail, and Qlife.
- Liaised between stakeholders and development teams, ensuring clear communication and translating business needs into technical specifications.
- Coordinated with backend and frontend developers to deploy website updates and enhancements.
- Delivered features on schedule in line with project goals and objectives.
- Tested and validated new features before deployment.

Technical Skills

Networking: Network infrastructure, network devices (routers, switches, firewalls), wireless access points, TCP/IP, OSPF, EIGRP, BGP, VLANs, inter-VLAN routing, DNS, DHCP, SNMP, syslog, network diagrams, LAN/WAN/Wireless
Network Security: Firewalls, ACLs, VPN (site-to-site & remote access), network monitoring, troubleshooting
Systems & Hardware: Operating system software (Windows), Linux, computer systems, computer hardware, Active Directory, Microsoft 365, VMware
Programming & Scripting: Python, Bash, C++, Java
Soft Skills: Communication, Dependable, Analytical, Teamwork, Adaptability

Certificates

CCNA (2021): Cisco Certified Network Associate
Qatar University Computing Club Outstanding Project Award, Robotics Track
In Progress: ISC2 SSCP (Systems Security Certified Practitioner)
In Progress: CCNP SCOR (350-701 Security Core)
In Progress: HTB Certified Defensive Security Analyst (CDSA)
